From: Chris Patterson  
To: IAEA NOTIFICATION  
Subject: October IAEA closeout meeting

(b)(4)

Other news:

We have received confirmation that the IAEA equipment has arrived in the U.S. and is currently going through customs.

Verbal notification was received from the IAEA inspectors of the schedule for the November 2003 IAEA inspection and equipment installation. The inspection will start on Wednesday November 5th and end on Friday November 7th followed with the equipment installation (Nov. 8 to 16). There will be two inspectors and two technicians visiting BWXT the month of November as follows: Inspectors Gabriel Bernasconi and Ok Seok Seo and technicians Ilse Mayer and Govindaraj Rengarajan. The technicians will arrive on Thursday the 6th and continue working on the equipment upgrade installation to November 16th. The technicians would like to work on the week-ends if necessary to complete the work (Nov. 8 & 9 and 15 & 16). If you see a problem with this work schedule, please let me know as soon as possible. Of course, all of this is dependent on their equipment arriving at the facility prior to Nov. 8th.

I would like to thank NRC Resident Geoff Wertz for performing the declaration disk transfer on Wednesday morning as there were no NRC from the NRC Washington office present during the inspection.

(b)(4)

I would again like to thank all those responsible for the success of the recent October scheduled inspection. The Operations, Security and Radiation Control support was excellent.

Feel free to call me at ext. 6734 if you have any questions.

Thank You.

Chris Patterson
