Re: Amendment to License No. 24-32091-01

Dear Ms. Simmons

In submitting our application to Amend License Number 24-32091-01 I would like to acknowledge my commitment and responsibility for the following:

- Radiation safety, security and control of radioactive materials, and compliance with the regulations;
- Completeness and accuracy of the radiation safety records and all information provided to NRC (10 CFR 30.9);
- Knowledge about the contents of the license and application;
- Meticulous compliance with current NRC and Department of Transportation (DOT) regulations and the licensee's operating and emergency procedures;
- Commitment to provide adequate resources (including space, equipment, personnel, time, and if needed, contractors) to the radiation protection program to ensure that public and workers are protected from radiation hazards and meticulous compliance with regulations is maintained;
- Selection and assignment of a qualified individual to serve as the Radiation Safety Officer (RSO) for licensed activities;
- Obtaining NRC's prior written consent before transferring control of the license; and
- Notifying appropriate NRC Regional Administrator in writing, immediately following filing of petition for voluntary or involuntary bankruptcy.

With over 5 years experience working with Radiation Safety Programs I am confident that Scott A Sharp will be able to administer TranSystems Radiation Safety Program with consistent compliance to licensed activities. I submit him as our Radiation Safety Officer.

Respectfully,

A handwritten signature in black ink, appearing to read "Mark W. Shafer".

Mark W Shafer P.E.
Vice President
TranSystems Corporation
