Mr. J. E. DYER  
Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555-0001

Dear Mr. Dyer:

I appreciate your letter dated June 11. Your letter responds to my letter of May 8, 2007, but it fails to answer my concerns. I have written several letters to you, but your responses circumvent the specific concerns raised in my letters. I receive phrases like "We take our mission seriously" and "have focused on" or "we work with" or "the requirements of" - you offer reassurances, but I still feel unassured.

Regarding Oyster Creek, I still feel:

- **Terrorism is real** (look at Madrid, London, The World Trade Center, Fort Dix)
- **It is not adequately defended** (sure defense has been beefed up, but adequate ?)
- **The only sure way to prevent a successful terrorist attack is to cease operations**

It is entirely within the domain of the NRC to deny continued operation of the Oyster Creek Nuclear Power Plant, within your "primary mission." Which agency would deny locating a nuclear plant in Jersey City or Midtown Manhattan?

Sincerely,

*Russell W. Goyette*
