

D.C. Cook 3/13/06

Normal yearly briefing.

Good interaction with staff on license renewal.

INPO rating (was 4) - now a 2 (exemplary). ^{1st plant to jump} 2 steps at once.

Best generation effort better.

Corrective backlog now 10-15 (was 400)

1997- Cook was INPO1

Fall 1997 - long shutdown

Without an inspection - just assumed there were only 600 hours.
- will go straight to weld repair on Unit 2
(before inspecting and then retesting).

B.5.b. - well ahead of schedule.

Already completed work on hydrogen burners.

Thinking new nuclear (2nd or 3rd wave)

D.C. Cook staff told get to INPO1, stay there, we love you -

D.C. Cook site not big enough to add another reactor. But they
still own several other sites which were originally planned
to potentially house commercial reactors.

Hiring interns

Working with inspectors.
