

11/22/76

TCT: Mr. M.L. Green
Union Carbide South Charleston West Va.

He was asked why he wanted the wording changed to condition 10. He told me that California had refused to grant reciprocity unless the wording was changed to ~~including~~ include. The wording "Temporary job site" I asked him to send me a copy of the letter from state of Calif.

On checking with John McHeath I found that a similar wording on a Dupont Corp. Broad license had been ruled not to provide for reciprocity.

I suggest that we amend condition 10 to read: "Licensed material shall be used only at the Technical Center, Kanawha Turnpike, South Charleston West Va. and at temporary job sites located at facilities of the licensee throughout non agreement states."

Mr. Green told me in our telephone conversation that they only want to use material and perform services at Union Carbide facilities.
