Re: Amendment of License 47-09576-01 to add Abid Yaqub, M.D. for therapeutic use of radiopharmaceuticals and to designate M. Douglass Allan, M.S., DABR as Radiation Safety Officer

Dear Reviewer:

The Radiation Safety Committee at St. Mary's Medical Center approved the request by Dr. Abid Yaqub to be added to the NRC license for therapeutic use of radiopharmaceuticals.

Documentation of his credentials is enclosed for your review.

We request amendment of License 47-09576-01 to add him as an Authorized User.

The Committee also approved and requests designation of Martin Douglass Allan, M.S., DABR as Radiation Safety Officer once again. He had been replaced briefly by Michael Bidy as RSO, but Mr. Bidy has left. Mr. Allan's credentials are already on file with you as he served as RSO for over 20 years.

Any questions regarding this request should be directed to M. Douglass Allan, M.S., DABR (RSO) or to me.

Sincerely,

Ruth Johnson, BSN, MBA
Vice President of Patient Services

Credentials Committee
St. Mary's Medical Center
2900 First Avenue
Huntington, WV 25702

Dear Credentials Committee:

I want to apply for provision of privileges to be able to treat patients with hyperthyroidism and thyroid cancer with radioactive iodine (RAI-131) at your facility. I have completed endocrinology fellowship from JCESOM, Marshall University, Huntington, WV (date of graduation 06-30-06) and I am currently working there as an Assistant Professor of Medicine and Associate Director of endocrinology fellowship program.

I have completed 100 hours of the basic radioisotope handling course covering the topics of radio pharmacy, radiation biology, radiation protection and safety, radiation physics and instrumentation, and the mathematics associated with use of radioactivity and received a passing grade. This course which was held from May 12-20, 2007 (Consultants in Nuclear Medicine, Chicago, IL) is designed to qualify a physician as an authorized user of radiopharmaceuticals, including the medical use of sodium iodide I-131 for procedures requiring a written directive. It meets all the requirements set forth by the US Nuclear regulatory Commission and all the agreement states as outlined in the current code of federal regulations.

In addition to the above, I have the experience of treating more than the required number of patients with hyperthyroidism and thyroid cancer under the supervision of Dr. Bruce Chertow, a NRC licensed user of radioactive iodine I-131 at Cabell Huntington Hospital and St. Mary's Medical Center. During my endocrinology fellowship I also had the following experience under supervision of Dr. Chertow: ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys; performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation of survey meters; calculating, measuring, and safely preparing patient or human research subject dosages; using administrative controls to prevent a medical event involving the use of byproduct material; and using procedures to contain spilled byproduct material safely and using proper decontamination procedures.

I am currently involved in clinical care of more than 40 patients with thyroid cancer and many patients with hyperthyroidism including those with Graves' disease and toxic uni-nodular and multi-nodular goiters.

I appreciate your kind consideration of my application. Please let me know if any additional information or documentation is required.

Yours sincerely,

Abid Yaquub MD
Assistant Professor of Medicine
Section of Endocrinology
JCESOM, Marshall University
Huntington, WV

Dear Credentials Committee:

The endocrinology training program for fellows is structured to provide didactic lectures and conferences and experience and training in the appropriate use of RAI 131 and 123 for diagnostic and radiotherapy for hyperthyroidism and thyroid cancer.

I attest to the above mentioned experiences and training given to Dr. Abid Yaquub MD. He is an excellent physician and quite capable of performing radioactive I-131 and I-123 diagnostic scans for detection of thyroid cancer and administering I-131 radiotherapy and caring for patients with hyperthyroidism and thyroid cancer.

Sincerely yours,

Bruce Chertow, M.D, F.A.C.P., F.A.C.E.
Professor and Chief
Section of Endocrinology

EXPIRES: 10/31/2008

Name of Proposed Authorized User

ABID Yaqub

State or Territory Where Licensed

WEST VIRGINIA

Requested Authorization(s) (check all that apply):

☐ 35.300 Use of unsealed byproduct material for which a written directive is required

OR

☒ 35.300 Oral administration of sodium iodide I-131 requiring a written directive in quantities less than or equal to 1.22 gigabecquerels (33 millicuries)☒ 35.300 Oral administration of sodium iodide I-131 requiring a written directive in quantities greater than 1.22 gigabecquerels (33 millicuries)☐ 35.300 Parenteral administration of any beta-emitter, or photon-emitting radionuclide with a photon energy less than 150 keV for which a written directive is required☐ 35.300 Parenteral administration of any other radionuclide for which a written directive is required**PART I -- TRAINING AND EXPERIENCE**
(Select one of the three methods below)

* Training and Experience, including board certification, must have been obtained within the 7 years preceding the date of application or the individual must have related continuing education and experience since the required training and experience was completed. Provide dates, duration, and description of continuing education and experience related to the uses checked above.

☐ **1. Board Certification**

- a. Provide a copy of the board certification.
- b. For 35.390, provide documentation on supervised clinical case experience. The table in section 3.c. may be used to document this experience.
- c. For 35.396, provide documentation on classroom and laboratory training, supervised work experience, and supervised clinical case experience. The tables in sections 3.a., 3.b., and 3.c. may be used to document this experience.
- d. Skip to and complete Part II Preceptor Attestation.

☐ **2. Current 35.300, 35.400, or 35.600 Authorized User Seeking Additional Authorization**

- a. Authorized User on Materials License _____ under the requirements below or equivalent Agreement State requirements (check all that apply):

☐ 35.390 ☐ 35.392 ☐ 35.394 ☐ 35.490 ☐ 35.690

- b. If currently authorized for a subset of clinical uses under 35.300, provide documentation on additional required supervised case experience. The table in section 3.c. may be used to document this experience. Also provide completed Part II Preceptor Attestation.
- c. If currently authorized under 35.490 or 35.690 and requesting authorization for 35.396, provide documentation on classroom and laboratory training, supervised work experience, and supervised clinical case experience. The tables in sections 3.a., 3.b., and 3.c. may be used to document this experience. Also provide completed Part II Preceptor Attestation.
