AGREEMENT STATE AUTHORITY TO FINGERPRINT (RCPD-07-004)

Dear Ms. Schlueter:

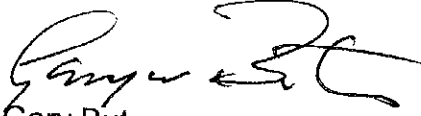

The California Department of Public Health, Radiologic Health Branch (CDPH/RHB) in consultation with the CDPH, Office of Legal Services and the California Attorney General's Office, reviewed the subject document and related information, and finds that the State of California cannot implement Section 652 of the Energy Policy Act of 2005 (amended Section 149 of the Atomic Energy Act) at this time.

We understand that consideration has been given to both: 1) having Agreement States require certain of their radioactive materials licensees submit fingerprints and criminal history record information (CHRI) requests to State authorities (i.e., the California Attorney General's Office) for processing, and 2) having Agreement States require certain of their radioactive materials licensees submit fingerprints and CHRI requests through the U.S. Nuclear Regulatory Commission (NRC) to the U.S. Federal Bureau of Investigation (FBI) for processing. Neither option appears to be supported by law at this time.

It is the opinion of the California Attorney General's Office that Option 1 would require enactment of a statute in California authorizing the collection and processing of fingerprints and CHRI requests through the California Attorney General's Office specifically for the purposes of this effort if the intent is to obtain CHRI from the FBI, rather than simply obtain State CHRI. CDPH is not currently pursuing such a statutory change at this time. Option 2 is viable only if the NRC (rather than the State of California) orders (or otherwise requires) the submission of the fingerprints and CHRI requests through their agency to the FBI, since the federal statute in question specifically names NRC (and not the Agreement States) as the responsible agency for this effort.
