Name: Philip N. Cavendor
Organization: Ur-Energy USA, Inc. Docket No. 030-37410
Control No. 471397
Fax: 720-981-5643
Phone: 720-382-4455
From: Jacqueline D. Cook
Date: August 1, 2007
Subject: Application dated February 7, 2007 & Response to Fax Deficiency dated
June 6, 2007 for New License
Pages: 2

Mr. Cavendor:

Per your application dated February 7, 2007, and your June 6, 2007, response to the fax deficiency dated May 10, 2007, the items on the next page are deficiencies which require your response. **Please respond to this fax by Thursday, August 9, 2007.** If you are unable to respond by this due date, please don't hesitate to contact me so we can discuss an extension to the date. Our fax number is (817) 860-8263. If you have any questions regarding this fax, please call me at (817) 860-8132. When responding to this fax, please include the docket and control numbers located at the top of this page.

Thanking you in advance for your cooperation, assistance, and prompt response in this matter.

/RA/
Jacqueline D. Cook
Senior Health Physicist

1. Please specify the street address, city, and state or other descriptive address (e.g., on Highway 10, 5 miles east of the intersection of Highway 10 and State Route 234, Anytown, State) for each facility at which licensed material will be **used, stored, or dispatched**. You may include a map for each facility if you would like.

Please note that field stations are locations where licensed materials are stored or used and equipment is dispatched to temporary job sites.

2. Please note that licensees must maintain permanent records on locations where licensed materials are used or stored while the license is in force. These permanent records are important for making future determinations about the release of these locations for unrestricted use (e.g., before the license is terminated). Acceptable permanent records include sketches, written descriptions of specific locations where radioactive material is used or stored, and records of any leaking sealed sources, tracer material spills, contaminated waste storage areas, or other unusual occurrences involving the spread of contamination in or around the licensee's facilities or field stations. Permanent decommissioning records described above are not required for temporary job site locations.

Please specify the street address, city, and state or other descriptive address where you will maintain your records important to decommissioning.

3. In your response to Item 9.E., you state, in part, that it is unlikely that a defect in the PFN tool would result in a hazard such that notification of the Commission would be either necessary or advisable. We feel that this is not an accurate statement; therefore, please commit to adopting appropriate procedures for identifying and reporting to NRC defects and noncompliance, as required by 10 CFR 21.21(a).
