

August 10, 2007

Mr. William F. Troxler, Jr.
Chairman and President
Troxler Electronic Laboratories, Inc.
3008 Cornwallis Road
P.O. Box 12057
Research Triangle Park, NC 27709

Dear Mr. Troxler:

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I wish to thank you for your July 25, 2007, letter to Chairman Klein and for keeping the agency informed of your activities related to the July 12, 2007, hearing of the Senate Committee on Homeland Security and Governmental Affairs, Permanent Subcommittee on Investigations (the Subcommittee).

The NRC has formed a working group which is preparing a comprehensive plan to resolve issues presented in the U.S. Government Accountability Office report, GAO-07-1038T, "Nuclear Security: Actions Taken by NRC to Strengthen Its Licensing Process for Sealed Radioactive Sources are Not Effective." The working group has also been tasked with including in its comprehensive plan, actions to resolve the Subcommittee staff's July 2007 report, "Dirty Bomb Vulnerabilities," and our Inspector General's March 30, 2007, report, OIG-07-A-12, "Summary Report and Perspectives on Byproduct Material Security and Control." The working group is familiar with your suggestions and will consider them as it works toward identifying NRC actions to resolve these issues. The NRC appreciates your efforts in working with us and the State of North Carolina. The NRC is committed to strengthening our licensing program for these radioactive sources in a manner that ensures both the protection of the public health and safety and their continued use for legitimate purposes.

Sincerely

/RA/

Charles L. Miller, Director
Office of Federal and State Materials
and Environmental Management Programs
