

LIST OF REQUESTED DATA SETS FROM THE DRIFT-SCALE HEATER TEST

Description of Data Sets

The NRC requests files that contain data collected from Multiple-Point Borehole Extensometer (MPBX) boreholes covering the duration of the heat-up and cool-down phases of the Drift-Scale Heater test. The data in the requested files include date, time, electrical current, temperature, and sensor name. Power and voltage data also are included for the heat-up phase. In the Department of Energy data base, the heat-up and cool-down files use a description similar to: Drift Scale Test (DST) temperature data for date to date.

The last data set requested includes information pertaining to coordinates of the MPBX boreholes and sensors, in addition to smoothed MPBX sensor data for the heat-up phase.

Data Tracking Numbers for Requested Data Sets

1. MO9807DSTSET01.000
2. MO9810DSTSET02.000
3. MO9906DSTSET03.000
4. MO0001SEPDSTPC.000
5. MO0007SEPDSTPC.001
6. MO0012SEPDSTPC.002
7. MO0107SEPDSTPC.003
8. MO0202SEPDSTTV.001
9. MO0208SEPDSTTD.001
10. MO0303SEPDSTTM.000
11. MO0307SEPDST31.000
12. MO0403SEPDST32.000
13. MO0408SEPDSTTD.000
14. MO0509SEPDSTTD.000
15. MO0603SEPDSTTD.000
16. MO0608SEPDSTEM.000
17. SN0207F3912298.037

Please include readme files associated with any of the data sets. If any data sets have been superseded, provide the data set that supersedes those listed above.
