RESPONSE TO THE NRC INFORMATION REQUEST DATED 7/23/07

1. In your letter dated July 9, 2007, you submitted the records associated with the disposals to the sanitary sewerage system for the year 2006. All records of release by disposal into sewer that exist for your license and previous licenses that were superseded by this current license must be submitted for radionuclides with a greater than a 120 day half life before termination.

Section 1 contains all past sewerage disposal records that exist. There are no other records of release by disposal into sewer that exist for this license or any previous licenses that were superseded by this license. To the best of my knowledge, there was no sewerage disposal for this or any other previous license prior to the earliest date of record shown in section 1.

2. Please state the units for the numbers displayed on your sewer disposal log.

The units for the numbers displayed on the 2006 sewer disposal log submitted to you in our July 9, 2007 submittal and the sewer disposal logs submitted in section 1 of this submittal are (MICROCURIES).

3. The request for termination of the licenses doesn't appear to be signed by a senior executive management. Please submit a letter signed by senior management stating that they concur with the request for license termination.

Please see letter in Section 3 from Mr. Joseph Catino, Senior Vice President of Research for Bayer requesting license termination.

4. Please confirm that you had no leaking sealed sources.

We have never had a leaking sealed source at the Bayer property located at 400 Morgan Lane, West Haven, Ct 06516.

5. In your letter dated July 9, 2007, it is stated that the room RB-007C must be a typographical error for RB-107C or RB-207C. Please submit surveys for room RB-107C or state why they are not needed.

Surveys for RB-107C are not needed. This room was principally a storage room that was being surveyed because of it's proximity to commissioned lab RB-107. There was no active radioactivity work conducted in this room. Surveys conducted were done so to only verify that nothing was being tracked into this room and there was never any data generated to suggest that tracking did occur.

6. In your letter dated July 9, 2007, it is stated that room RB-233 must be a typographical error for RB-231 or RB-232. Please submit surveys for room RB-231 or state why they are not needed.

Survey data and information for RB-231 is present in the Philotechnics Decommissioning Report submitted to you on in April, 2007. Copies of the application pages from that report are shown in section 6 of this submittal.

7. Please confirm that you will follow 10 CFR 31.5 requirements for the transfer of the generally licensed items.

We will follow the 10 CFR 31.5 requirements for the transfer of the generally licensed items remaining at the site that are being transferred to the new owner.

SUBJECT: Bayer Pharmaceuticals Corporation, request for additional information. Concerning application for amendment to license, control no. 140429

Dear Mr. Lawyer,

As the senior executive manager for Bayer Pharmaceuticals Corporation associated with NRC license number 06-13053-04, I concur with the request for license termination and the release of the facility for unrestricted use that was sent to you on April 17, 2007 by Mr. Peter D. Babin.

Sincerely,

Dr. Joseph Catino
Senior Vice President
Bayer Pharmaceuticals Corporation

**The Bayer facility located at 400 Morgan Lane in West Haven,
Connecticut never had a leaking sealed source.**

Surveys for RB-107C are not needed. This room was principally a storage room that was being surveyed because of it's proximity to commissioned lab RB-107. There was no active radioactivity work conducted in this room. Surveys conducted were done so to only verify that nothing was being tracked into this room and there was never any data generated to suggest that tracking did occur.
