Subject:	corrected copies needed for -01G and -02 licenses
(NOTE: This will be used as the Documents Title in ADAMS)	

1. A Corrected copy is needed for the -01G license because condition 9B refers to Condition 11, although it should refer to condition 12.
2. A Corrected Copy is needed for the -02 license because condition 9A refers to Shield Source model 619-5791 and it should be 618-5791.
3. Bill Rowan some questions regarding the export license he is applying for. We discussed that it had to list each activity he wanted to be authorized to do: 1) export radioactive waste (which I don't think will be allowed) , 2) export tritium for recycling/recovery and 3) export devices with greater than 1-0 curies H3 in them etc.
4. He also had questions about importing...he did no realize they would be authorized under the general license to import signs from Shield Source.

Action Required: Issue Corrected Copies.
