Historical Hurricane Tracks

The Historical Hurricane Tracks tool is an interactive mapping application that allows you to easily search and display Atlantic Basin and East-Central Pacific Basin [tropical cyclone](#) data.

Looking for a Specific Storm Track? Curious Where Hugo, Fran, or Even Dot Made Landfall?

Check out the [Query Storm Tracks](#) feature. Easily search for tropical cyclone tracks from Atlantic and Pacific data by entering a ZIP Code, latitude and longitude coordinates, city or state, or geographic region and then view the selected tracks on a map.

Additional Site Features

The following sections will help you better understand population change in coastal areas and the history and details of tropical cyclones.

- **Coastal Population Tool:** Interactively search and display coastal population data versus hurricane strikes for coastal counties from Maine to Texas.
- **Tropical Cyclone Reports:** Access storm reports written by hurricane specialists at the National Hurricane Center. Reports are available for the Atlantic and East-Central Pacific Basins.

Current Storm Information

Please note this site only provides historical information. Visit [these recommended Web sites](#) for current storm information.

Web Designers, Programmers...Got Your Own Hurricane Site?

Now you can provide customized storm track queries right from your Web site. Learn how with the [Query Expediter](#) tool.

These Hurricane Statistics were taken from NOAA's Costal Services Center Historical Hurricane Database

Listed below are all the documented storms that passed within 100 nautical miles of Waynesboro, GA

Year	Month	Day	Storm Name	Winds (mph)	Pressure (mb)	Classification
1901	9	28	NOTNAMED	35	0	E
1908	10	23	NOTNAMED	35	0	E
