Subject: Comments on SA-201 Procedure

Jenny -- Please accept my comments on the proposed changes to SA-201. I currently work for the Illinois Emergency Management Agency in Emergency Preparedness, and was Chair of the Organization of Agreement States a few years ago (2000-2001).

Overall, the changes to the procedure seem to make sense. I especially like the addition of Appendix G with Frequently Asked Questions.

I only have one comment on Appendix A, Section II, "State Submittal Guidance," paragraph A. The first sentence in that paragraph reads, "When regulations are at the draft stage or, preferably, the public comment stage, the Radiation Control Program Director, or designee, or CRCPD (Director) should submit the regulations to the Deputy Director, STP." Later in that same paragraph, the proposed language would say, "For final promulgated regulation changes, the RCPD is requested to identify..."

I am simply suggesting that if you choose to use the acronym RCPD, you should add that in the first sentence so it will read, "When regulations are at the draft stage or, preferably, the public comment stage, the Radiation Control Program Director (RCPD), or designee, or CRCPD (Director) should submit the regulations to the Deputy Director, STP." Appendix A is the first and only time this acronym is used in the document.

These are my personal comments on the procedure, not official comments from the Illinois Emergency Management Agency.

Thank you for your consideration.

Subject: Comment for STP-06-080

Ms. Tobin,

Washington State, Office of Radiation Protection staff have reviewed the draft document revision of STP procedure SA-201 titled "Review of State Regulatory Requirements (STP-06-080)." The document appears to be acceptable. We have no additional comments to add. Thank you for this opportunity.

Subject: Comments on revised SA-201 procedure

Jenny,

This is in response to Janet Schlueter's August 31, 2006 memorandum to Steve Reynolds regarding the revised STP Procedure SA-201, "Review of State Regulatory Requirements." We have no comments on the revision.

Thank you for the opportunity to comment on the procedure.

-Jim
