Subject: License Renewal Questions concerning possession limits

Summary: Discussed the possession limits to be included in Item 8.A for the 1-83 designation. Mr. Partridge does not want to list this using the 10CFR30 Appendix B values. Instead he requested we list the limits as "500 millicuries per nuclide, not to exceed 10 curies total". He also requested that Hydrogen-3 be listed for 5 curies total and Carbon-14 for 1 curie total.

Also, an 8/14/07 telecon with Roberto Torres revealed the licensee has submitted an updated financial assurance "Statement of Intent" (November 2004) covering the requested inventory on the license.
