Dave:

Thank you for the message...

Please ensure all documents submitted to us are in final. Use NUREG-1757 as guidance in explaining the use and justification of the Resident Gardener Scenario to model the DCGL...

Item 3 (discussion on height of detector) is still outstanding. We just need some discussion/clarification (can be brief) as to why you are using some other scanning distance (6 in.) other than what MARSSIM recommends (2 in.).

Gene,

I have items one and two being worked on by Cabrera (new schedule and new org chart).

Is item 3 (discussion on height of detector) still an outstanding request? Or did Pat Haworth already provide this to you?

Cabrera is also working on a write-up on the new DCGL including new scenario (Resident Gardener) and parameters and a discussion on the future land use. They say they will get a draft of the revised schedule, org chart and DCGL write-up to me next week. Once the Navy/Army has reviewed and approved we will forward to you.

Thanks,

David Horton

David:

Attached is the conversation record which outlines our discussion with Pat Hayworth on July 26, 2007 and the list of items that still needs to be addressed. Please get back with Mike or me with any questions or concerns.

Thanks,
_Gene
