NUCLEAR REGULATORY COMMISSION

441 G Street NW
Washington, D.C. 20548

Gentlemen:

This is just a quick note regarding Seabrook, N. H. Nuclear Power Plant;

I had written to others previously about the underworld should be "ID"ed and removed from this area. It has not been done, and now they have a bigger mess to remove.

I have photos of energy that is used by the Jr. underworld ("perps") et al and it can enter the 'facility' as floating ability and create magnetic type of programming with individuals and equipment, also in and out to a distance. The "stuff" comes from now a greater area and more intense.

The plant should not be operated with computers. It should be converted to mechanical. When you can control items on the internet with/without a pointer and communicate/hear others (heard mostly as a *fuzz* when on a neural/skull microwave system via the energy, you know you are see. and control the system. Equipment may also be entered with magnetics.

Your agency is not paying attention to technology. The underworld is a huge operation in the U.S. because they are not looked at from their communications and operations in the whole area, and some of the U.S. Some financing could be from an Arab source.

You just can't just fly planes around once in a while. You have to get on the ground.

Sincerely

Robert P. Burke

Dear Sir:

I have to regular mail you a letter regarding "Seabrook" - the underworld "wacked" the Internet

Robert P. Burke, P. O. Box 42, Rye Beach, N. H. 03871

2007

Photograph contains energy “specks” inside Rye, N. H. Library, not far from “travel” to Seabrook Power Plant.

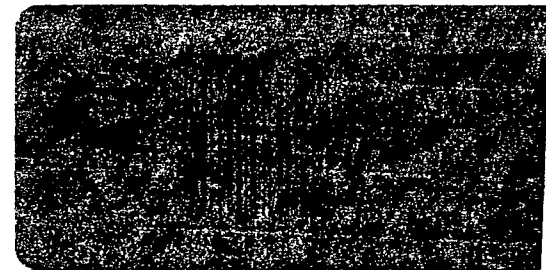

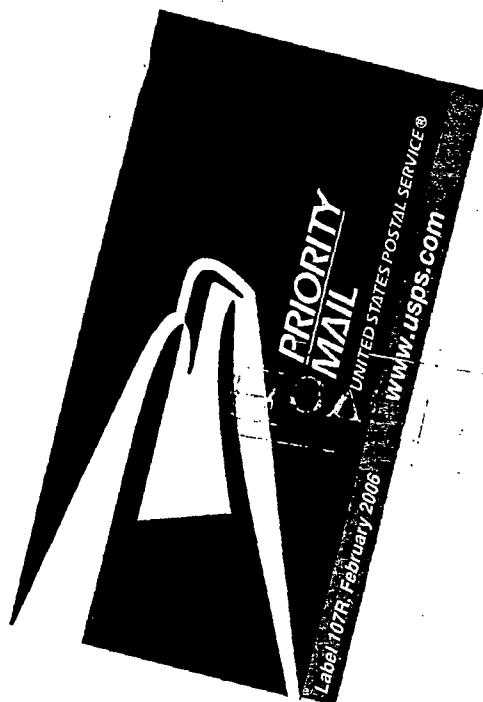

One of the energies that are flown through in approach/departure from the eastern end of "Pease" runway (Portsmouth International Airport) N. H.
