Subject: Re: more info

The reason I am mapping the caves is to see how well their locations compare with the electronic imaging and fracture trace analysis work that was done for the site.

Allen

I was discussing your call with Bruce and Jerry and we would like to have more information as to what you are using the coordinates and mapping data for. Please send me an email detailing what you are doing and how the info we gathered is being used.

We are between projects and are interested in taking entrance photos and getting UTM coordinates with GPS on the caves in JPG. We do most of our location work after the leaves fall and usually after fall hunting seasons are finished. The next project we are looking at is at the Charlestown Army Ammunition Depot but haven't begun the project process yet.

Thanks

Ray
