SUBJECT: WILLIAM B. MCGUIRE NUCLEAR STATION - SECURITY INSPECTION
05000369/2007201 AND 05000370/2007201

Dear Mr. Peterson:

On June 22, 2007, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at the William B. McGuire Nuclear Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on June 22, 2007, with you and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel. This report documents one NRC-identified finding of very low safety significance concerning the failure to evaluate adequately the effectiveness of a change to the William B. McGuire Nuclear Station Physical Security Plan.

The NRC is treating this violation as a non-cited violation consistent with Section VI.A.1 of the NRC Enforcement Policy because of the very low security significance of the violation. If you contest this non-cited violation, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN.: Document Control Desk, Washington, DC 20555-001; with copies to the Regional Administrator Region II; the Director, Office of Enforcement, Nuclear Regulatory Commission, Washington, DC 20555-001; and the NRC Resident Inspector at the William B. McGuire Nuclear Station.

Enclosure contains Safeguards Information . Upon removal, this letter is decontrolled.
