Docket No. 52-010

August 23, 2007

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555-0001

Subject: Licensing Topical Report (LTR) – NEDE-33239P “GE14 for ESBWR Nuclear Design Report”

On June 1, 2007, GE-Hitachi Nuclear Energy Americas (GEH) transmitted the “Updated Integrated Plan and Schedule – ESBWR Design Certification Application” letter MFN 07-265. The Integrated Plan and Schedule included an LTR schedule attachment that identified a revision to the subject LTR that was scheduled for submittal to the NRC on August 24, 2007. On June 13, 2007, GEH stated in response to RAI 21.6-88S02 (letter MFN 06-467, Supplement 2) that the subject LTR would be revised to include a revision to Section 1.5.1 for bypass flow in the PANAC11 computer code.

Since this time, GEH determined that the subject LTR revision was fulfilled in Revision 2, which was submitted to the NRC under MFN 07-223 dated May 3, 2007. The statement concerning the lookup table is already contained in Section 1.5.1. Therefore, a revision to the LTR is not warranted.

If you have any questions or require additional information regarding the information provided here, please contact me.

Sincerely,

James C. Kinsey
Project Manager, ESBWR Licensing
