A note from Brett Albanese. He is GA-DNR's nongame fish guy. I plan on looking around Vogtle Monday, April 9th.

From Brett:

I was glad I went to Fort Gordon. I got some *Elassoma okatie* and some really nice *Etheostoma fricksium* and *Etheostoma serriferfor picutres*. Based on what I saw at in Boggy Gut Creek, I think you are really unlikely to get *E. okatie* unless you have some slackwater habitat with abundant aquatic plants. A consultant called me to ask about *E. okatie* habitat. I returned her call, but she has not gotten back to me yet.

Best,

Brett

Overheard Jim Peterson and Mary Freeman and some others (don't know  
their names) discussing how well you did in your interview process up  
here and that the previous person (female) had not done well. Rock on!
