Hi Dr. Barry,

I wanted to let you know that I got your message and will have to ask around to get those answers-- Will get back with answers asap. Thanks!

wendy

Hi Wendy,

Thank you so much for your response.

Can you please tell me what rivers and Lake the Naegeleria was discovered? I noticed the attachment said it was in Southern GA, what county(ies)?? The report also states that N.fowleri was isolated from two of three river samples and from a control sample taken from a local lake.

Thank you,

Richard C. Barry, PhD

Hi Dr. Barry,

It was nice to talk with you this morning. I wanted to send the attached excel file for your perusal indicating what county legionellosis cases in Georgia occurred in 2004-2006. I hope this is helpful to you.

Also, in regards to your inquiry about Naegeleria, there has been one case in the last five years, and this one documented in the MMWR in 2002

<http://www.cdc.gov/mmwr/preview/mmwrhtml/mm5240a4.htm>

Please let me know now if you need any additional information!!

wendy
