

Nuclear Plant  
Attn: Ms. Davis  
Safeguards and Security  
P.O. Box 11111-A  
Somewhere, SP 00000

SUBJECT: IAEA SELECTION

Dear Ms. Davis:

As you are aware, the Nuclear Plant will be receiving high enriched uranium (HEU) from the U.S. Government which will be down blended to low enriched uranium (LEU). This material has been selected by the International Atomic Energy Agency (IAEA) for the application of international safeguards.

In accordance with the U.S./IAEA Safeguards Agreement, the IAEA will be applying safeguards to the HEU and resulting LEU at the Nuclear Plant for verification purposes to which it is entitled under 10 CFR 75.13. In this connection, we expect that the IAEA inspectors will require access to material control and accounting information as CONFIDENTIAL National Security Information (NSI) at your facility.

Therefore, pursuant to 10 CFR Part 95.36, enclosed is the Disclosure Authorization for the release of NSI to IAEA inspectors. NRC will provide advance notification to your office when the identities of the IAEA inspectors are known.

In order that arrangements can be made to facilitate compliance with 10 CFR Part 75, the NRC Division of Facilities and Security should be notified immediately if you believe that IAEA's visit requires access to NSI above the CONFIDENTIAL level.

The IAEA representatives will present credentials as specified in 10 CFR 75.7 to confirm their identity.

Should you have any questions, please contact Wayne G. Burnside of my staff at 301-415-2211.

Sincerely,

Thomas O. Martin, Director  
Division of Facilities and Security  
Office of Administration

Enclosure: as stated

Enclosure 9

## DISCLOSURE AUTHORIZATION

In accordance with 10 CFR Part 95.36, the NRC Division of Facilities and Security hereby authorizes the Nuclear Plant to disclose CONFIDENTIAL National Security Information (CNSI) in connection with verification visits and inspections pursuant to 10 CFR 75.13 and 75.42. Restricted Data may not be disclosed to IAEA inspectors. The disclosure of CNSI must:

- o Be identified for release under the Reporting Identification Symbol "UEH."
- o Be marked specifically for release to IAEA.

Additionally, the Nuclear Plant is required to:

- o Maintain records regarding IAEA visits and inspections for five years beyond the date of the visit or inspection. Such records shall specifically identify each document that was released and its date.
- o Identify the categories of documents that were released to an IAEA representative and the date of the release.
- o Maintain the NRC Division of Facilities and Security disclosure authorization for five years beyond the date of the visit or inspection.
- o Take the necessary measures to preclude access to NSI by participants of other international agreements unless provided for under the terms of a specific agreement.

This disclosure authorization expires upon completion of IAEA's tasks.

(signed) \_\_\_\_\_  
Thomas O. Martin, Director  
Division of Facilities and Security  
Office of Administration
