That the The Nuclear Regulatory Commission (NRC) is writing a "generic" environmental impact statement for in-situ uranium mining is a ghastly environmental assault.

It is wrong to restrict public comment on future uranium licenses. That's a tyrannical abuse of power. One size fits all does not match the realities of life.

There have already been too many cases where negligent and corrupt uranium mining tactics have fouled the environment, killing and sickening unsuspecting victims. Further damage is morally depraved.

Sidney J. Goodman, P.E., M.S.M.E.
