Attention: James Mullauer

RE: Amendment of NRC License
Control Number: 316325

Dear Mr. Mullauer:

Pursuant to our recent telephone conversation, please find the additional information that you have requested

Mr. Miller has worked for Medical Physics Consultants since May of 2000. I am Mr. Miller direct supervisor and during his employment at MPC he has consulted in all aspects of radiation safety as they pertain to Nuclear Medicine, Radiation Therapy, Brachytherapy and Diagnostic Radiology. Mr. Miller has been performing RSO duties under my supervision for the past two years.

His training and work experience is listed below:

Training in Nuclear Medicine: NRC and State facility audits, equipment quality control, fetal dose calculations, patient dose calculations, effluent calculations, NRC license preparation and amendments, annual radiation safety training, brachytherapy audits, HDR remote afterloader audits, gamma camera and PET scanner acceptance testing. Additionally

Training in Diagnostic Radiology: Equipment compliance testing of R/F, Mammography, Cardiac Cath Labs and CT equipment, shielding calculations, fetal dose calculations and facility audits.

Teaching: Mr. Miller has taught in local radiology residency programs and at MPC RSO/Authorized user course.

I have known Mr. Miller for over 25 years and during that time he has demonstrated fine moral fiber and is a man of high character. Mr. Miller is an excellent physicist and would be able to perform independently as a RSO. His knowledge and expertise covering the many regulatory rules and requirements are excellent. I would not hesitate to recommend him for the position as Radiation Safety Officer. Mr. Miller has over twenty five years work experience in Nuclear Medicine.
