Subject: Site Characterization Activities at Texas Site

Reference: Letter from Exelon Generation Company, LLC, "Response to Regulatory Issue Summary 2007-08, 'Updated Licensing Submittal Information to Support the Design-Centered Licensing Review Approach,'" dated May 31, 2007

In the referenced letter, Exelon Generation Company, LLC (Exelon) notified the NRC of its intent to submit a combined license application for a greenfield site in Texas and that site characterization activities were expected to commence in July 2007.

The purpose of this letter is to advise the NRC that Exelon began subsurface investigation activities at a greenfield site in Matagorda County, Texas. Approximately 10 miles south of Collegeport, the site is across Tres Palacios Bay from the town of Palacios, and north of Oyster Lake. The site is approximately 1,250 acres.

This information is being provided for the NRC to schedule a visit to the site to observe the subsurface investigation activities. The subsurface investigation activities are scheduled to be completed by the end of September 2007.

If you have any questions about this letter, please contact me at (610) 765-5312.

Respectfully,

Kenneth A. Ainger
Director, New Plant Licensing
