SUBJECT: SPECTRA GASES, INC., LICENSE AMENDMENT, CONTROL NO. 140849

Dear Mr. Dietz:

This refers to your license amendment request. Enclosed with this letter is the amended license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

Note that your application should have been signed by a management representative rather than the Radiation Safety Officer. A letter signed by a management representative indicates that management has reviewed the application and concurs in the statements and representations contained therein. Note also that a management representative should sign all future correspondence that requests a change in your license.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 8:00 p.m. EST, Monday through Friday (except Federal holidays).

A. Dietz

Amendment No. 4

14. The licensee shall label each tritium product or material distributed under this license as follows: "This product shall not be incorporated in any food, beverage, cosmetic, drug or other commodity or product designed for ingestion or inhalation by, or application to, a human being."
15. The licensee shall maintain records of transfer of tritium material and file a report with the U.S. Nuclear Regulatory Commission, Region 1, identifying the type, quantity and initial concentration of the radionuclide in each product or material at the time of transfer during the reporting period.

The initial report shall be filed within 30 days of September 30, 2008. Subsequent reports shall be filed within 30 days following

- (a) Five years after filing the preceding report; or
- (b) Filing an application for renewal of this license; or
- (c) Notifying the NRC of the licensee's decision to permanently discontinue activities authorized under this license.

If no transfers of byproduct material have been made during the reporting period, the report shall so indicate.

16. Licensed material shall not be used in or on human beings.
17. The licensee shall not use licensed material in field applications where activity is released except as provided otherwise by specific condition of this license.
18. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
