BASELINE INSPECTION REPORT 05000325/2007401 AND 05000324/2007401

Dear Mr. Scarola:

On August 24, 2007, the U. S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Brunswick Steam Electrical Plant. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed report documents the inspection results, which were discussed with you, and other members of your staff on August 24, 2007.

This inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of this inspection no findings of significance were identified.
