Re: Amendment to License Number 37-19786-01

American Refining Group (ARG) currently owns three (3) fill gauges containing Americium 241.

One of the gauges has not been used in many years. The source was registered with the Off-Site Source Recovery Project at Los Alamos National Laboratories (LANL). They have recently contacted me and indicated that they will be coming through this area in the fall of this year.

In preparation for recovery, ARG would like to remove the source from the gauge and store it until LANL is able to arrive on site and take possession of the source. Therefore, ARG requests a modification of it's License to allow storage of the sealed source outside the gauge.

American Refining Group, intends to continue to use the other two sealed sources in our fill gauges located within our packaging facility.

If you have any questions, please contact me at (814) 368-1327.

Sincerely,

Monica C Mathers
Radiation Safety Officer
American Refining Group, Inc.

This is to acknowledge the receipt of your letter/application dated

9/6/2007, and to inform you that the initial processing which includes an administrative review has been performed.

☒ AMEND. 37-19786-01 There were no administrative omissions. Your application was assigned to a technical reviewer. Please note that the technical review may identify additional omissions or require additional information.

☐ Please provide to this office within 30 days of your receipt of this card

A copy of your action has been forwarded to our License Fee & Accounts Receivable Branch, who will contact you separately if there is a fee issue involved.

Your action has been assigned **Mail Control Number** 141060.
When calling to inquire about this action, please refer to this control number.
You may call us on (610) 337-5398, or 337-5260.
