NAME OF PERSON(S) CONTACTED OR IN CONTACT

Jennifer Walton, Ph.D., CIH
Radiation Safety Officer

ORGANIZATION (OFFICE, DEPT. ETC.)

Central Michigan University
College of Science and Technology FAX
Mt. Pleasant, MI 48859

TELEPHONE NO.

989-774-4189

SUBJECT

Control No. 316333 – Regarding request by letter dated June 19, 2007, to add to NRC License No. 21-01432-02, Pb-210 as small sealed sources, obtained from Isotope Products Labs, with a total possession limit of 40 microcuries, to be used for calibration purposes.

SUMMARY

In telephone conversation with Dr. Walton on this date, I related that we would void this amendment request because Pb-210 is a natural occurring material and not "byproduct material" and therefore NRC has no regulatory authority at this time over this material. I noted that regulations are being drafted which may make this material subject to NRC licensing in the future, but not at this time. Based upon this information, Dr. Walton concurred with our voiding the licensing action.

ACTION REQUIRED

The License Reviewer will void the subject licensing action based upon the information, as noted above.

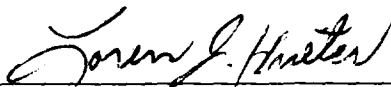

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
