**INTERMEDIATE CONSIGNEE(S) IN FOREIGN
COUNTRY(IES) AND/OR IN THE U.S.**

NONE

OTHER PARTY(IES) TO IMPORT AND/OR EXPORT

NONE

COUNTRY(IES) OF ULTIMATE DESTINATION: Canada, France, Netherlands, Philippines, South Korea, Singapore, South Africa, Thailand, and United Kingdom.

**CONDITIONS, NOTES, AND DESCRIPTIONS OF 10 CFR PART 110, APPENDIX P,
BYPRODUCT MATERIALS TO BE IMPORTED AND/OR EXPORTED**
(NOTE: SEE PAGE 2 FOR DEFINITIONS OF CATEGORY 1 AND CATEGORY 2)

Export, to facilities listed on Page 3, Category 2 quantity of Iridium-192, contained in sealed sources for use in industrial radiography and for the development of custom design.

Licensee is responsible for compliance with all applicable import, export, and other domestic regulatory requirements, including all terms and conditions of domestic materials license(s).

Industrial Nuclear Company, Inc. is exempt from submitting information required by 10 CFR §110.32(d) and "pertinent documentation" required by 10 CFR §110.32(h) with its application for named and unnamed recipients in foreign countries, until 24 hours prior to shipment.

License expiration date is based on May 31, 2010 expiration date of The Commonwealth of Massachusetts, Department of Public Health, Radiation Control Program, Materials License 27-9661. This license replaces CBP0017a and amends its authority to extend the expiration date from August 24, 2007 to May 31, 2010.

//////////////////////////////////////END//////////////////////////////////////

Neither this license or any right under this license shall be assigned or otherwise transferred in violation of the provisions of the Atomic Energy Act of 1954, as amended.

This license is subject to the right of recapture or control by Section 108 of the Atomic Energy Act of 1954, as amended, and to all of the other provisions of said Act, now or hereafter in effect and to all valid rules and regulations of NRC.

THIS LICENSE IS INVALID UNLESS SIGNED BELOW
BY AUTHORIZED NRC REPRESENTATIVE

A handwritten signature in black ink, appearing to read "Scott Moore".

Calculation of Shipments Containing Multiple Sources or Radionuclides:

The "sum of fractions" methodology for evaluating combinations of radionuclides being transported, is to be used when import or export shipments contain multiple sources or multiple radionuclides. The threshold limit values used in a sum of the fractions calculation must be the metric values (i.e., TBq).

I. If multiple sources and/or multiple radionuclides are present in an import or export shipment, the sum of the fractions of the activity of each radionuclides must be determined to verify the shipment is less than the Category 1 or 2 limits of Table 1, as appropriate. If the calculated sum of the fractions ratio, using the following equation, is greater than or equal to 1.0, then the import or export shipment exceeds the threshold limits of Table 1 and the applicable security provisions of this part apply.

II. Use the equation below to calculate the sum of the fractions ratio by inserting the actual activity of the applicable radionuclides or of the individual sources (of the same radionuclides) in the numerator of the equation and the corresponding threshold activity limit from the Table 1 in the denominator of the equation. Ensure the numerator and denominator values are in the same units and all calculations must be performed using the TBq (i.e., metric) values of Table 1.

R₁ = activity for radionuclides or source number 1

R₂ = activity for radionuclides or source number 2

R_N = activity for radionuclides or source number n

AR₁ = activity limit for radionuclides or source number 1

AR₂ = activity limit for radionuclides or source number 2

AR_N = activity limit for radionuclides or source number n

$$\sum_{i=1}^n \left[\frac{R_i}{AR_i} + \frac{R_2}{AR_2} + \frac{R_n}{AR_n} \right] \geq 1$$

NOTIFICATIONS: The notifications required by 10 CFR 110.50(b)(4) are to be emailed to hoo1@nrc.gov (preferred method) or faxed to 301-816-5151. In the subject line of the email or on the fax cover page include: "10 CFR 110.50(b)(4) Notification." To contact someone in the Operations Center, use the same e-mail address or call 301-816-5100. The contact information is current at the time of license issuance. Difficulties notifying the U.S. Nuclear Regulatory Commission must be promptly reported to the Office of International Programs' import/export licensing staff.

¹ The values to be used to determine whether a license is required are given in TBq. Curie (Ci) values are provided for practical usefulness only and are rounded after conversion.

² The limits for Pu-238 and Pu-239/Be in this table apply for imports to the U.S. The limits for exports of Pu-238 and Pu-239/Be can be found in § 110.21.
