

U.S.NRC

UNITED STATES NUCLEAR REGULATORY COMMISSION

Protecting People and the Environment

Public Outreach Meeting North Anna Power Station Unit 3 Combined License Application

Thomas Bergman, Deputy Director
for Licensing Operations
Division of New Reactor Licensing

Purposes of this meeting

- Discuss the potential combined license for one new nuclear plant at North Anna
- Explain what the NRC does during the review of a combined license application
- Describe how you can participate in the NRC review process

Nuclear Regulatory Commission

- Mission: to protect the public health and safety, promote the common defense and security, and protect the environment
- Independent Agency
- Over 30 years experience regulating operating reactors and other civilian uses of nuclear materials

Combined License Application Review and Construction Inspection

- Thomas Kevern, Project Manager
 - Overall Combined License Application Review
- Alan Bjornsen, Project Manager
 - Environmental Review
- Michael Webb, Reactor Operations Engineer
 - Construction Inspection

Safety Review

- Ensure facility will be constructed and operated safely by reviewing:
 - Design of facility
 - Quality assurance
 - Security plan
 - Emergency preparedness (with the Federal Emergency Management Agency)
 - Operator Training
 - Applicant's process to verify that the nuclear plant will be built as designed and operated in accordance with NRC regulations
- Clearly document our safety findings
- Maintain an open and transparent process

Opportunities for Public Participation

- Obtain information at www.nrc.gov
 - NRC processes and how to participate
 - Publicly available information about the license application
- Meetings between the NRC and the applicant
- Comment on environmental review
- Participate in Advisory Committee on Reactor Safeguards meetings
- Participate in the hearing process

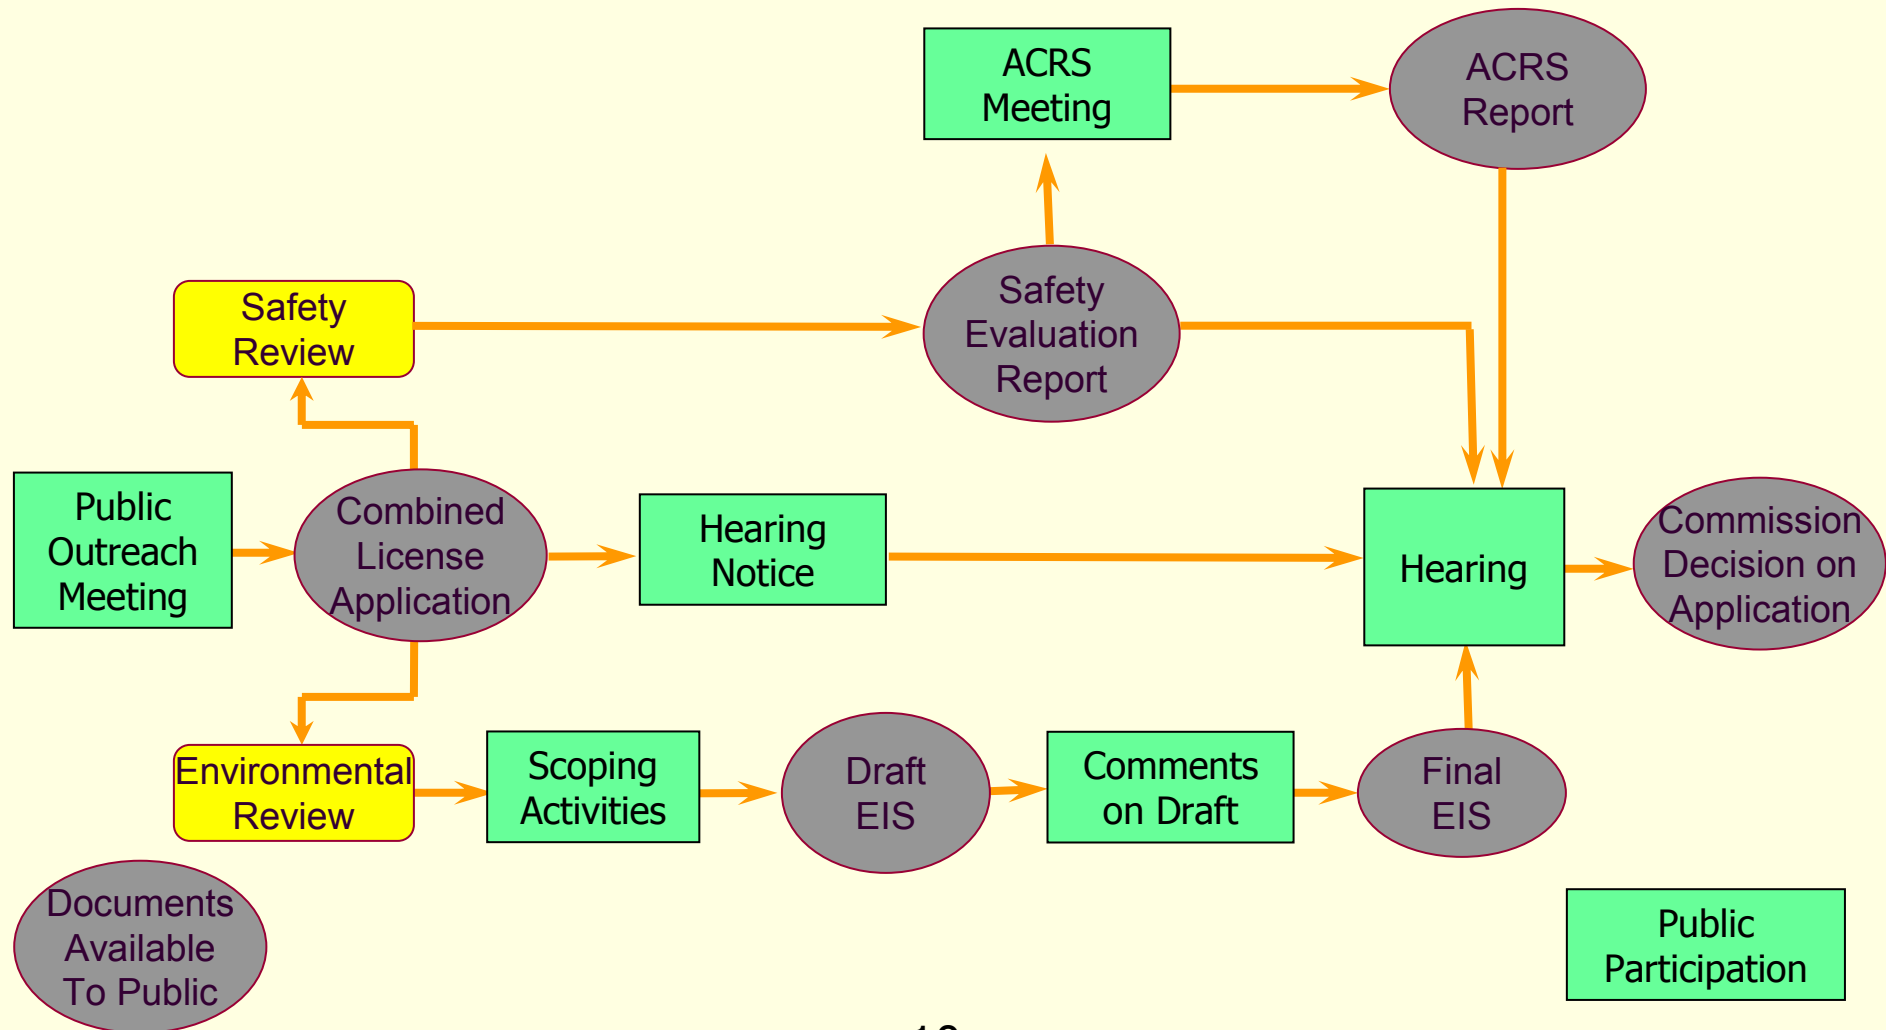

The Hearing Process

- NRC issues a Notice of Hearing in the *Federal Register*, which offers an opportunity for the public to participate in the hearing as a party (called “intervention”)
- A request (petition) to intervene must be filed within 60 days of the date of the Notice
- The requestor must state his or her interest that may be affected by granting the license, and at least one acceptable dispute with the application
- Three judges (Atomic Safety and Licensing Board (ASLB)) will decide whether to grant intervention and conduct the hearing
- A person who did not seek to intervene or was not granted intervention may make a statement to the Board, although this statement is not evidence in the hearing
- Regulations governing intervention are in 10 C.F.R. 2.309

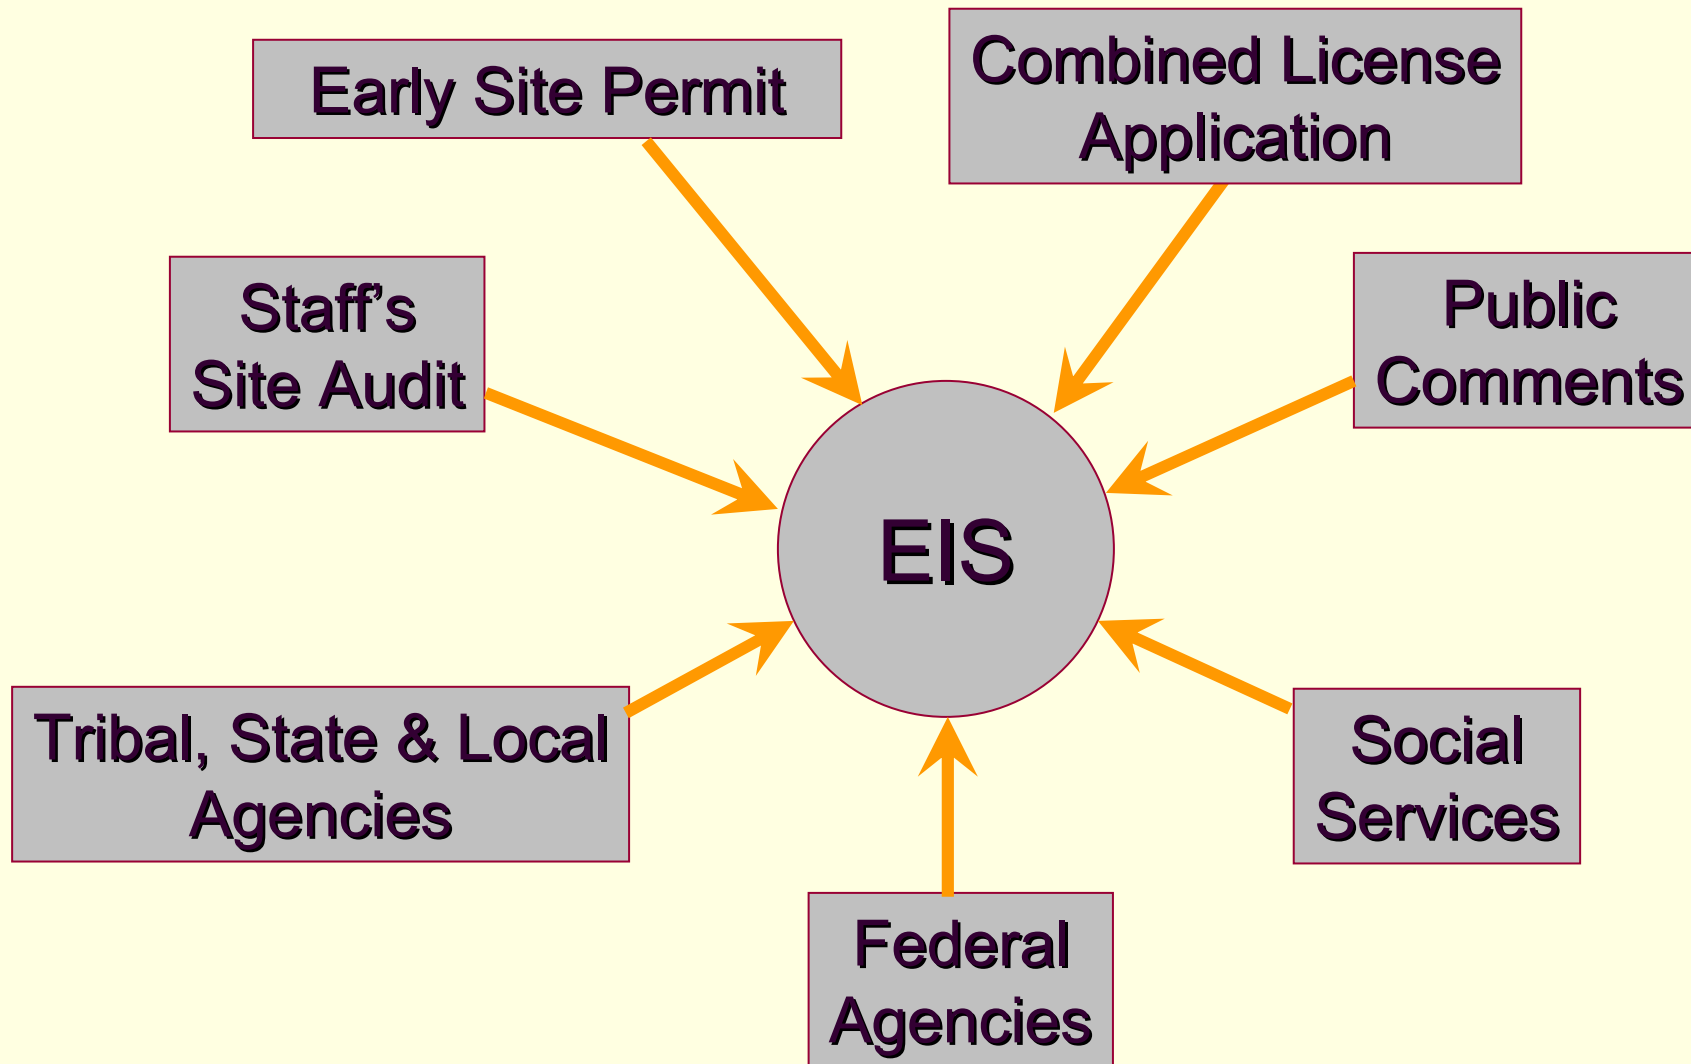

National Environmental Policy Act (NEPA)

- NEPA requires Federal agencies to use a systematic approach to consider environmental impacts
- An Environmental Impact Statement (EIS) is required for major Federal actions that may significantly affect the quality of the human environment
- Granting a combined license is considered a major Federal action

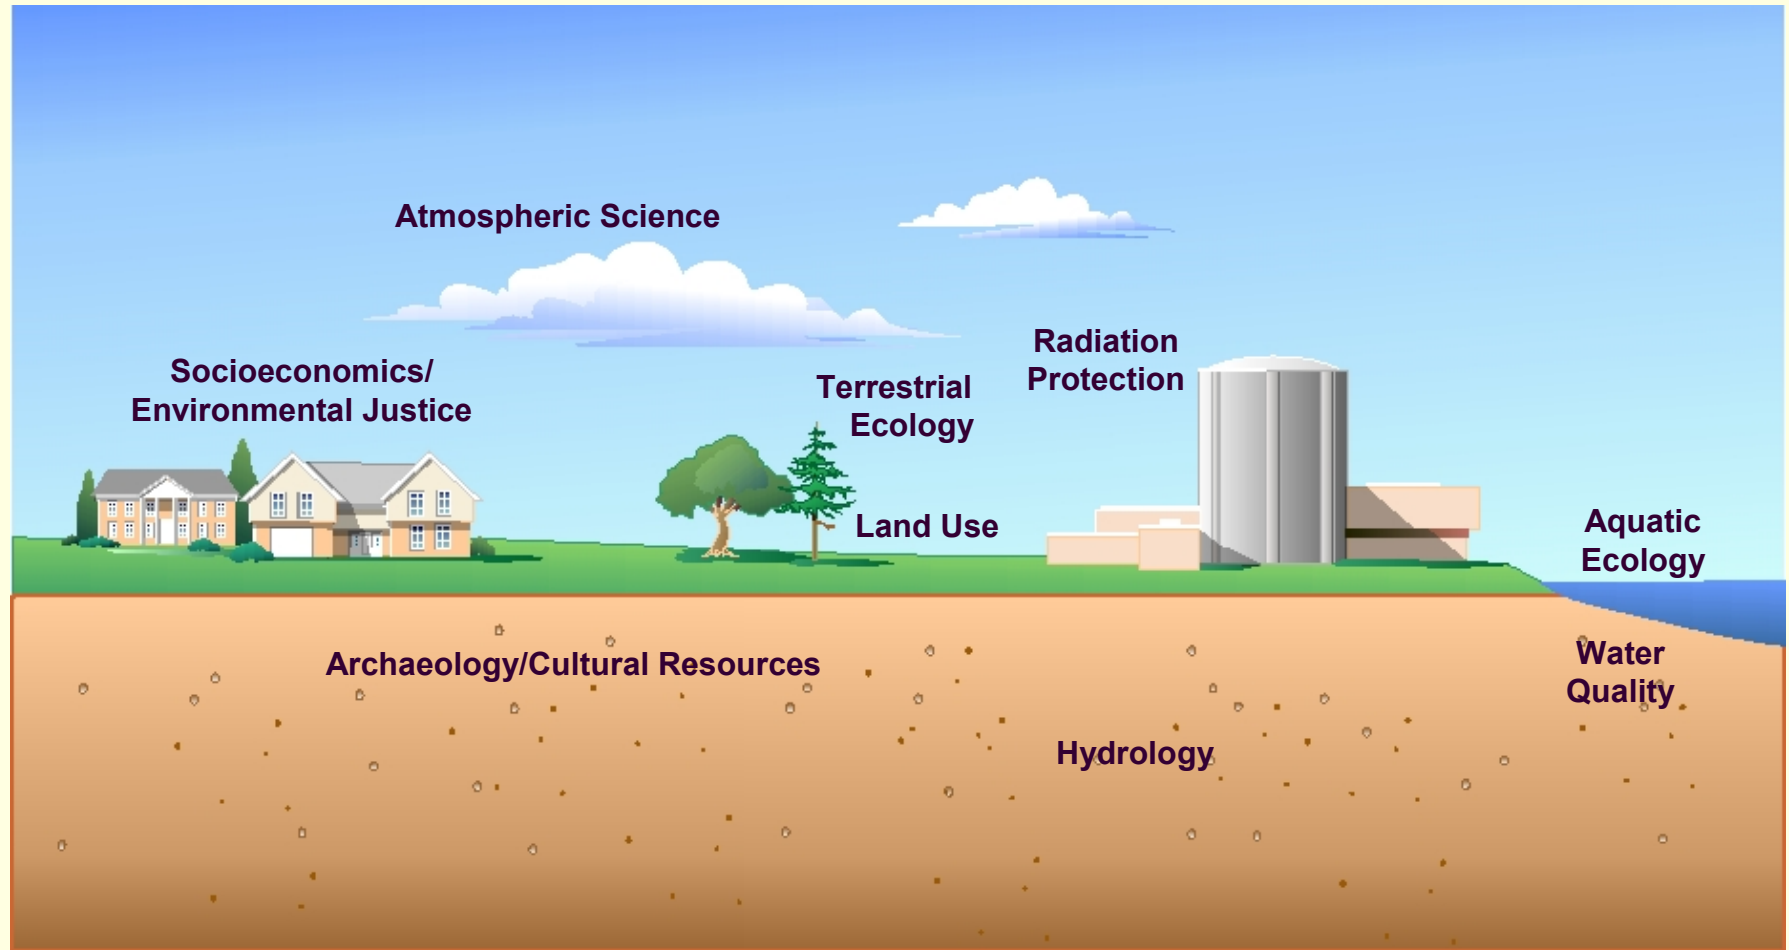

Combined License Application Review Process

Information Gathering

Environmental Review Areas

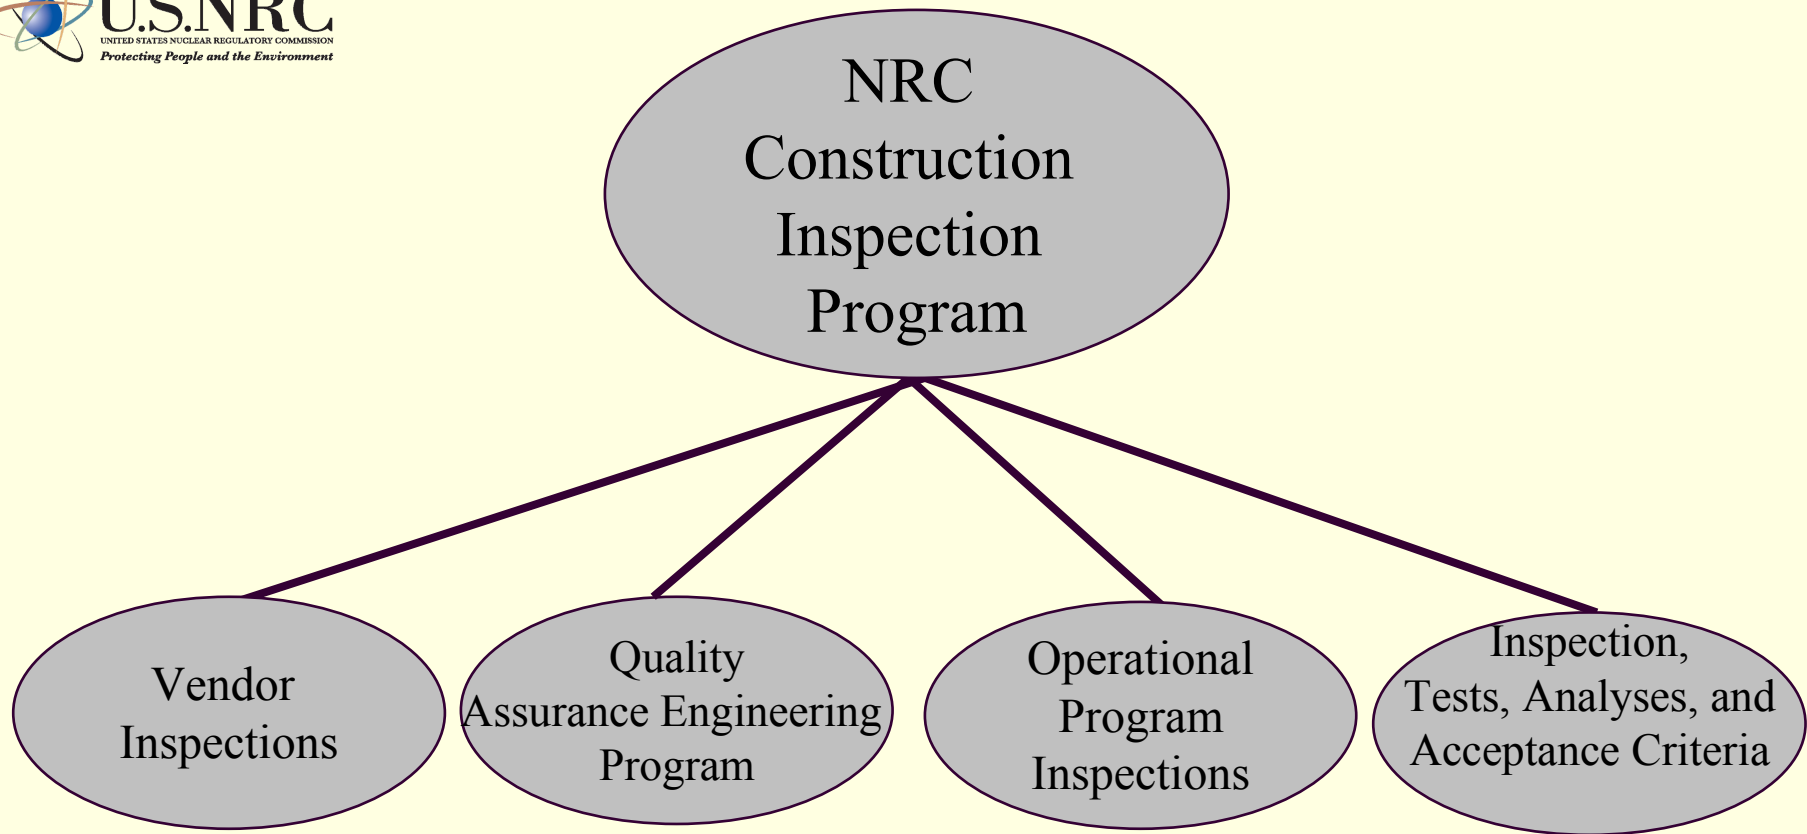

If an Early Site Permit is Granted

- For the environmental review:
 - Unresolved issues are fully evaluated
 - Resolved issues – staff determines if there is new & significant information
 - New information may not be significant – conclusion in the Early Site Permit Final EIS stands
 - New information that is significant – evaluate impacts against previous conclusions from the Early Site Permit Final EIS

If the License is issued....

- The NRC will authorize the licensee to start construction of a nuclear power plant and to operate the completed plant, if specified conditions are met.
- NRC staff will inspect nuclear safety–related construction activities.
- NRC will verify that the plant is built as designed prior to operation (required by regulation).

ITAAC

- ITAAC means Inspections, Tests, Analyses, and Acceptance Criteria.
- ITAAC are the means by which the licensee demonstrates, and the NRC confirms, that the plant was built properly.
- Prior to plant operation all acceptance criteria must be met.
- Provides an opportunity for separate hearing based on whether acceptance criteria are met.

NRC CONTACTS

- Thomas Kevern, Combined License Project Manager
 - TAK@NRC.GOV, 301-415-0224
- Mohammed Shuaibi, Chief, ESBWR/ABWR Project
 - MAS4@NRC.GOV, 301-415-3232
- Alan Bjornsen, Environmental Project Manager
 - ABB5@NRC.GOV, 301-415-1195
- Richard Raione, Chief, Environmental Projects Branch
 - RPR4@NRC.GOV , 301-415-1018
- Michael Webb, Reactor Operations Engineer,
Construction Inspection and Allegations Branch
 - MKW@NRC.GOV , 301-415-1347
