

October 17, 2007

Mr. Richard S. Goorevich, Director
National Nuclear Security Administration
U.S. Department of Energy, NA-243
Office of International Regimes and Agreements
1000 Independence Avenue, SW
Washington, D.C. 20585-1615

Dear Mr. Goorevich:

Enclosed is an application for a license (XSNM3513), recently received by the U.S. Nuclear Regulatory Commission from Urenco, Inc., for the re-export of low-enriched uranium (LEU) to England. This Russian-origin LEU was originally imported into the United States for processing and subsequent re-export. The material has been treated as working stock at AREVA NP Inc. The original intended end-user is not able to utilize the material and it is now proposed for re-export in the same form as originally imported. The LEU will be exported to Urenco's Capenhurst, England enrichment facility; Urenco-Capenhurst will hold the material as working inventory. Subsequent export will be subject to EURATOM export controls.

Assurances from EURATOM, that the material will be subject to all the terms and conditions of an agreement for cooperation, are required. Your assistance in obtaining the necessary assurances will be appreciated.

Sincerely,

/RA/

Stephen Dembek, Branch Chief
Export Controls and International Organizations
Office of International Programs

Enclosure:
Appl. Dtd. 10/02/07
XSNM3513 - England (EURATOM)
