Docket 72-10
License No. SNM-2506

2007 Prairie Island ISFSI Safety Analysis Report (SAR) Correction

Reference: 1) Letter L-PI-07-080 from Nuclear Management Company, LLC (NMC) to NRC, "2007 Biennial Report of Changes, Tests, and Experiments for the Prairie Island ISFSI and Prairie Island ISFSI Safety Analysis Report (SAR)," dated October 19, 2007.

In Reference 1, NMC submitted the updated pages for Revision No. 11 of the Prairie Island ISFSI SAR. There was an error on one of the pages – the Record of Revisions on page 15 of the List of Effective Pages failed to include Revision 11. The corrected page is enclosed. Also, two pages were omitted from Reference 1 (pages 9.5-1 and 9.5-2). These pages are enclosed.

Summary of Commitments

This letter contains no new commitments and no revisions to existing commitments.

I certify that the information contained herein accurately presents changes made since the previous submittal.

Michael D. Wadley
Site Vice President, Prairie Island Nuclear Generating Plant
Nuclear Management Company, LLC

PRAIRIE ISLAND INDEPENDENT SPENT FUEL STORAGE INSTALLATION SAFETY ANALYSIS REPORT

Revision: 11

Page 9.5-1

9.5 EMERGENCY PLANNING

The Prairie Island Emergency Plan describes the organization, assessment actions, conditions for activation of the emergency organization, notification procedures, emergency facilities and equipment, training, provisions for maintaining emergency preparedness, and recovery criteria used at the Prairie Island Nuclear Generating Plant. This emergency plan will also be used for any radiological emergencies that may arise at the ISFSI.

Portions of the Emergency Plan and applicable implementing procedures reflect the actions to be taken during off normal and accident conditions. Damage to a loaded cask confinement boundary will result in declaration of a Notification of Unusual Event.
