Subject: Extension Request for Longer Term Corrective Action

References: 1) NRC License SNM-1097, Docket 70-1113
2) NRC Inspection Report 70-1113/2007-203, October 12, 2007
3) GNF-A Response to Notice of Violations, November 9, 2007

Global Nuclear Fuel – Americas, L.L.C.'s (GNF-A) facility in Wilmington, North Carolina, hereby requests that the scheduled completion date for one of our additional corrective actions described in Reference 3 be extended.

Regarding our response to Violation No. 2007-203-03, last fall we initiated a concerted effort to perform process equipment accident scenario reviews as described in additional corrective action number 2. The reviews are taking longer to complete than originally forecast and as a result this corrective action is now scheduled for completion by April 30, 2008.

Because the reviews may cause additional changes to our revised integrated safety analysis (ISA) summary document to be submitted to NRC by January 30, 2008, if revisions to the ISA summary are necessary, an updated version of this document will be submitted to NRC in a timely fashion after the reviews are complete.

Please contact me on (910) 675-5950 if you have any questions or would like to discuss this matter further.

Sincerely,
