## **Task Order 19**

## **Ad-Hoc Support for Informal, Short-Term Support Projects**

### **A. Background**

The Office of Information Services (OIS) has taken the direction that all requests for support from within the NRC should be serviced, at least at the basic level. This task order identifies the types of tasks that will be requested by the NRC and the resulting actions that should be taken once those tasks have been identified.

### **B. Scope**

The scope of this task order is limited to work to be performed for current automated computer systems and future systems (if any) after they are developed and placed into production at the NRC.

This SOW defines the level of effort to be expended on tasks such as providing technical support on an ad hoc, informal, short-term basis to assist with support projects. The efforts would include, but not be limited to, ad hoc report creation, database creation, working with staff early on to map strategy, define key business points, and the like, for IT projects (e.g., screening forms).

### **C. Statement of Work**

#### **1. Maintenance**

The Contractor shall be responsible for making necessary changes to ensure that identified problems with a system/module are corrected and the system is returned to production in the shortest amount of time possible.

#### **Maintenance Requests:**

The NRC TOM/client shall notify the Contractor of system maintenance requests using the Rational ClearQuest change request system, in accordance with the Delivery Order, Statement Of Work, Section C.3, Subsections 3.1 "Maintenance" and 3.2 "Maintenance Change Request Process." The Contractor shall follow the procedures contained in the "OIS Application Change Request System Guide using Rational ClearQuest" to document all maintenance work performed and completed.

#### **2. Ad Hoc Support**

The work shall include, but is not limited to, the following tasks:

- a. The Contractor shall provide ad hoc reporting capabilities, as required. This may include the creation of a report using Crystal Reports, Microsoft Access, and other software. It may also include the modification, or assistance in modifying, existing reports.

- b. The Contractor shall provide assistance in the creation of a database that could be used for report generation.
- c. The Contractor shall provide assistance in the creation of screening forms.
- d. The Contractor shall provide technical support to make fixes or enhancements to small applications (approved in the Technical Reference Model) not presently covered under another M&O task order.
- e. Requests:
  - a. The NRC TOM shall issue requests via email to the responsible contractor.
  - b. The Contractor shall document all requests, noting the originator and action requested.
  - c. The Contractor shall provide an assessment of the effort needed to complete the request and forward it to the NRC TOM.
  - d. The NRC TOM shall review the Contractor's assessment and respond to the Contractor within 2 days.
  - e. A copy of the completed request shall be sent to the NRC TOM.

#### **D. Schedule of Deliverables**

<u>Deliverable</u>	<u>Responsibility</u>	<u>Delivery Schedule</u>
