Lisle, Illinois 60532

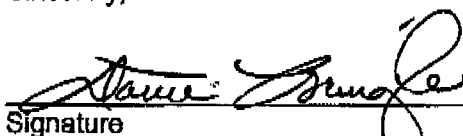

License Number 24-01090-03

Dear Materials Licensing Section:

Please amend our materials license to list Leslie Behm, M.S., as our Radiation Safety Officer (RSO). In support of this request we have attached Administrations appointment of Leslie as RSO and her acceptance of the RSO's duties and responsibilities. Leslie has had experience as an assistant RSO at another NRC licensee while being listed on their license as an Authorized Medical Physicist. The attached NRC FORM 313A (RSO) details Ms. Behm's training and experience as an RSO, and attestation that Leslie can function independently as a RSO.

If you have any questions regarding this amendment application, please contact Whit Sanders, Manager Radiation Oncology at (417) 625-2937.

Sincerely,

The Radiation Safety Officer(RSO) is responsible for implementing the radiation safety program. The licensee, through the Radiation Safety Officer, shall ensure that radiation safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the licensee's Radioactive Material Program.

The duties and responsibilities of the Radiation Safety Officer will include ensuring the following:

- Stopping unsafe activities involving licensed material;
- Radiation exposures are ALARA;
- Up-to-date radiation protection procedures in the daily operation of the licensee's byproduct material program are developed, distributed, and implemented;
- Possession, use, and storage of licensed material is consistent with the limitations in the license, the regulations, the SSDR Certificate(s), and the manufacturer's recommendations and instructions;
- Individuals installing, relocating, maintaining, adjusting, or repairing devices containing sealed sources are trained and authorized by an NRC or Agreement State license;
- Personnel training is conducted and is commensurate with the individual's duties regarding licensed material;
- Documentation is maintained to demonstrate that individuals are not likely to receive, in one year, a radiation dose in excess of 10% of the allowable limits or that personnel monitoring devices are provided;
- When necessary, personnel monitoring devices are used and exchanged at the proper intervals, and records of the results of such monitoring are maintained;
- Licensed material is properly secured;
- Documentation is maintained to demonstrate, by measurement or calculation, that the total effective dose equivalent to the individual likely to receive the highest dose from the licensed operation does not exceed the annual limit for members of the public;

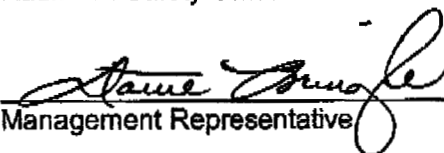

- Proper authorities are notified of incidents such as loss or theft of licensed material, damage to or malfunction of sealed sources, and fire;
- Medical events and precursor events are investigated and reported to NRC, and cause(s) and appropriate corrective action(s) are identified, and timely corrective action(s) are taken;
- Audits of the radiation protection program are performed at least annually and documented;
- If violations of regulations, license conditions, or program weaknesses are identified, effective corrective actions are developed, implemented, and documented;
- Licensed material is transported, or offered for transport, in accordance with all applicable DOT requirements;
- Licensed material is disposed of properly;
- Appropriate records are maintained; and
- An up-to-date license is maintained and amendment and renewal requests are submitted in a timely manner.

I accept the duties and responsibilities of the Radiation Safety Officer for St. John's Regional Medical Center, Lic. No. 24001090-03.

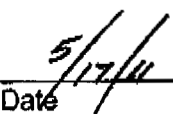

Leslie Behm, M.S.
Authorized Medical Physicist

Administration of St. John's Regional Medical Center appoints Leslie Behm as Radiation Safety Officer.
