U. S. Department of the Interior
Washington, D. C. 20242

Dear Mr. Monson:

In accordance with the understandings which were reflected in Secretary Udall's letter of March 20, 1964 to Chairman Seaborg, I am forwarding Volumes I and II of the Facility Description and Safety Analysis Report filed by Wisconsin Public Service Corporation with its application covering the proposed construction and operation of the Kewaunee Nuclear Power Plant. The proposed reactor is to be located on the applicant's site on the west shore of Lake Michigan in the Town of Carlton, Kewaunee County, Wisconsin.

We would appreciate receiving a report from the Fish and Wildlife Service concerning those features of the proposed reactor operation which might have radiological effects on fish and shellfish.

Sincerely yours,

Original signed by:
Roger S. Boyd

Roger S. Boyd, Assistant Director
for Reactor Projects
Division of Reactor Licensing
