**Attachments:** Resending: NMSS Reponse re: Funding Needs for Japan Follow-up

Vonna,

Nothing specific for the division, but we did provide the estimated funding needs for Japan follow-up to the EDO staff and CFO staff yesterday via the attached e-mail.

Just for your awareness, Region III asked whether they should be doing the same sort of follow-up for spent fuel pools at decommissioning reactors and GE Morris as was being done at operating reactors and the answer is no. The IN and TI will only focus on operating reactors as the other pools are considered lower risk. This distinction was also made when issuing orders to each class of facilities and the TI will focus on actions taken in response to the orders.

Eric

If you have any items for the 8am EDO call this morning, please let me know.

Thanks,  
Vonna
