

Appendix C – Requests for Additional Information

Throughout the course of the review of the V.C. Summer Nuclear Station (VCSNS) combined license (COL) application, the staff requested additional information (RAIs) of South Carolina Electric and Gas. The following is a list of these RAIs and the responses.

As noted in Section 1.2.3 of this report, a design-centered review approach (DCRA) was used in the review of the VCSNS COL application. The first COL application submitted for NRC staff review in a design center is designated as the reference COL (RCOL), and the subsequent applications in the design center are designated as subsequent COL (SCOL) applications. The Bellefonte Nuclear Plant (BLN) Units 3 and 4 COL application was originally designated as the RCOL application for the AP1000 design center, and the staff issued a safety evaluation report (SER) with open items that documented its review of both standard and site-specific information (for all chapters except Sections 3.7, 3.8, 13.6, 13.7, and 13.8 and Appendix 19A). The RCOL for the AP1000 COL design center switched from the Bellefonte COL application to the Vogtle COL application after the issuance of the Bellefonte SER with open items. The VCSNS COL application has been designated as an SCOL. Therefore, in addition to the list of RAIs that follows that are based on site-specific information, SCE&G had to endorse RAI responses from the RCOLs (both Bellefonte and Vogtle) that were determined to be standard to the AP1000 COL design center. The endorsement of these standard RAIs can be found in the following letters:

- Endorsement of Bellefonte R-COLA Standard Content Request for Additional Information, dated May 12, 2009, ADAMS accession number ML091380157. This letter provides endorsement of standard responses that were provided in a Tennessee Valley Authority (TVA) letter dated October 24, 2008.
- Endorsement of Bellefonte R-COLA Standard Content Request for Additional Information, dated May 12, 2009, ADAMS accession number ML091380164. This letter provides endorsement of standard responses that were provided in a TVA letter April 15, 2009, which supplements the TVA letter dated October 24, 2008.
- Endorsement of Bellefonte R-COLA Standard Content Request for Additional Information, dated January 20, 2010, ADAMS accession number ML100250431.
- Endorsement of Vogtle R-COLA Standard Content Request for Safety Evaluation Report Open Items, dated January 20, 2010, ADAMS accession number ML100250429.
- Endorsement of Vogtle R-COLA Standard Content Submittals dated August 25, 2011, ADAMS accession number ML102380466.
- Endorsement of Vogtle R-COLA Standard Content Submittals dated July, 11, 2011, ADAMS accession number ML11194A005.

The following notes pertain to the table on the proceeding pages:

- Question numbers were assigned based on the section of the standard review plan that was associated with the question (e.g., question 02.03.04-1 was generated based on the staff's review of the application against section 2.3.4 of the standard review plan).
- The NRC letter number is a unique number that was assigned to the letter that transmitted

the RAIs to the applicant. If the RAI was not transmitted to the applicant by an NRC letter (e.g., the applicant provided a “voluntary submittal” to address questions from the staff or to inform the staff of changes to the application as a result of changes to the AP1000 design control document) then the applicant’s letter was added to the database for tracking purposes and assigned an RAI number. For these “tracking” RAIs, the RAI letter number is “0”.
