Documents Title in ADAMS)

Mr. Boggess stated in a telephone conversation on July 13 that all of the locations on the licensee should remain on the license in the renewal process as they were all locations of storage. I asked him to submit documentation stating such and he should also list them. In a letter dated July 14, Mr. Bogess listed 9 of the 11 sites. I contacted him to ask for clarification because he had previously stated they should all be listed and wanted to know if the missing sites were inadvertently omitted, He stated that he did not place them on there because he wanted to in fact remove them from the license. I told him if he wanted to remove them he would now have to submit documentation that the source never leaked while stored at those locations. He stated that the portable gauges were never stored at either location. I confirmed that he in fact only wanted the 9 sites listed on the July 14 letter and to remove the two sites that were missing. He stated yes. I asked him to send documentation stating he wished to remove them and that the gauges had never been stored there
