**LEVY NUCLEAR PLANT, UNITS 1 AND 2
DOCKET NOS. 52-029 AND 52-030**

**VOLUNTARY SUBMITTAL RELATED TO THE PIPE BREAK HAZARD ANALYSIS DESCRIBED
IN CHAPTER 3 OF THE FINAL SAFETY ANALYSIS REPORT**

Ladies and Gentlemen:

Progress Energy Florida, Inc. (PEF) hereby submits a correction to the Pipe Break Hazard Analysis information described in Chapter 3 of the Final Safety Analysis Report for the Levy Nuclear Plant Units 1 and 2 (LNP), Revision 2, in response to a question posed by the NRC staff. Subsection 3.6.4.1 of the FSAR contains information that should have been removed since it was superseded by standard content information inserted in Revision 2. The first two paragraphs of Subsection 3.6.4.1, which are marked with a Left Margin Annotation (LMA) of LNP COL 3.6-1, will be removed in a future revision of the LNP application. The five paragraphs with a LMA of STD COL 3.6-1 remain and represent the correct information related to the actions to be taken to resolve COL Item 3.6-1.

If you have any further questions, or need additional information, please contact Bob Kitchen at (919) 546-6992, or me at (727) 820-4481.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on July 22, 2011.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Elnitsky', written over a horizontal line.

John Elnitsky
Vice President
New Generation Programs & Projects
