existing physical security license condition to require NextEra to fully implement and maintain in effect all provisions of the Commission approved cyber security plan.

Following a review of the amendment request, the NRC staff provided revised wording for the proposed change to the license condition regarding physical security. Attachment 1 provides a mark-up of the Facility Operating License (FOL) that contains the revised wording to the license condition. Attachment 2 provides a re-typed page of the FOL that incorporates the revised wording for the license condition.

This supplement to the requested amendment does not alter the conclusions in Reference 1 that the proposed change does not involve a significant hazard consideration pursuant to 10 CFR 50.92 and that the change meets the criteria of 10 CFR 51.22(b). A copy of this letter has been forwarded to the New Hampshire State Liaison Officer pursuant to 10 CFR 50.91.
