Subject: EDM Qualification Tests
File: J-120a

50-331

Dear Mr. Shay:

In order for General Electric to perform a timely qualification testing program for their Electro Discharge Machine (EDM) on irradiated fuel bundles, we are allowing General Electric the use of spent fuel at DAEC. The NRC has performed a safety evaluation and issued a 10 page report to General Electric on May 12, 1976 that approved of the process. The report was issued by D. Eisenhut of the NRC to G. Ross of General Electric.

We expect the qualification test program will begin on May 16, 1976 and be completed by May 22, 1976.

Very truly yours,

Ellery L. Hammond
