Docket No(s).

030-38027

Name of Licensee: Consolidated Coal Company**Name of Participant(s):** Joseph Richards & Sattar Lodhi**Telephone No.** 724 485 4696**Subject:** GL Devices

The licensee requested an amendment to change the RSO. The licensee is currently authorized for fixed gauges. I called the licensee to discuss if they had any GL devices and devices containing Ra-226 or any other radioisotope. I also explained to the licensee the possibility of including these GL devices in their specific license. I also reviewed the latest inspection documentation and noted that the licensee also possessed 2 GL devices containing Cs-137. I had Mike Reichard check the GL database for this licensee (Shoemaker Plant). He found that the licensee had 3 GL devices.

The licensee indicated that they would like to include all their GL devices on their specific license. I informed the licensee that according to our records, they possessed three GL devices. The licensee stated that they will search their records to confirm how many devices they possessed and will send a letter requesting that these devices be included in their specific license.

I provided him with DNMS fax number and the control number for this action.
