SUBJECT: REQUALIFICATION PROGRAM INSPECTION - PILGRIM NUCLEAR POWER
STATION

Dear Mr. Smith:

In a telephone conversation on August 10, 2011, Mr. John Caruso, Senior Operations Engineer, and Mr. Randy Haislet, Assistant Operations Manager for Training, made arrangements for the U. S. Nuclear Regulatory Commission (NRC) to inspect the licensed operator requalification program at the Pilgrim Nuclear Power Station facility. The inspection is planned for the week of October 3, 2011, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish: 1) an index or summary of condition reports written in the past two years in which licensed operator errors were determined to be the root or contributing cause; 2) an index or summary of condition reports written in the past two years on simulator performance problems; 3) an index or summary of simulator performance test results in the past two years; and 4) the examination schedule, sample plan, written examinations and operating test scheduled for the week of the inspection to the NRC by September 19, 2011. Mr. Haislet has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
