President / Radiation Safety Officer
CRD & Associates, Inc.
10735 Lambert International Boulevard
P.O. Box 10348 / Lambert Field
St. Louis, MO 63145

Dear: Mr. Rapp,

Enclosed is Amendment No. 03 renewing your NRC Material License No. 24-24559-02 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that we modified License Condition No. 11. A to change the name the person in charge of the radiation program to "Radiation Safety Officer" (RSO). This change was done to standardize the nomenclature in your license to that of a typical portable gauge license.

We also removed License Condition No. 11. B. as appeared in Amendment No. 02 of your NRC Materials License. You will no longer be able to self-appoint RSOs as this condition previously allowed, the NRC must do that for you as part of the amendment process.

For future RSO changes please submit the name of the proposed RSO; his/her training and experience qualifications; a statement signed and dated by the proposed RSO that s/he accepts the position as RSO and that s/he understands the duties and responsibilities associated with the RSO position.

In addition, we updated NRC Materials License by modifying License Condition Nos. 13. C and 15. We also added License Condition No. 13. F. These changes should enhance your awareness of regulatory requirements and the radiation safety program elements in your license.

Lastly, we removed License Condition No. 19 from your license as it appeared in Amendment No. 02. This license condition is now redundant since we have added possession limits to your license. This change required renumbering subsequent license conditions.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

C. Rapp

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael G. Herr".

Michael G. Herr, CHP
Materials Licensing Branch
