ENVIRONMENTAL - FILE (NEPA)

Docket No. 50-331

Honorable Robert D. Ray
Governor of Iowa
Des Moines, Iowa 50319

Dear Governor Ray:

The Iowa Electric Light and Power Company, the Corn Belt Power Cooperative and the Central Iowa Power Cooperative (the licensees) are the holders of Construction Permit No. CPFR-70, issued by the Atomic Energy Commission on June 22, 1970. The construction permit authorizes the licensees to construct a boiling water nuclear power reactor designated as the Duane Arnold Energy Center, at the Iowa Electric Light Power Company's site in Linn County, Iowa. The facility is designed for initial operation at approximately 1593 megawatts (thermal).

In accordance with Section E.3 of the Commission's regulations implementing the National Environmental Policy Act of 1969 (NEPA), Appendix D of 10 CFR Part 50 (Appendix D), the licensees have furnished to the Commission a written statement of reasons, with supporting factual submission, why the construction permit should not be suspended, in whole or in part, pending completion of the NEPA environmental review. This statement of reasons was furnished to the Commission on October 18, 1971.

The Director of Regulation has considered the licensees' submission in light of the criteria set out in Section E.2 of Appendix D, and has determined, after considering and balancing criteria in Section E.2 of Appendix D, that construction activities at the Duane Arnold Energy Center authorized pursuant to CPFR-70 should not be suspended pending completion of the NEPA environmental review.

Further details of this determination are set forth in a document entitled "Discussion and Findings by the Division of Reactor Licensing, U. S. Atomic Energy Commission, Relating to Consideration of Suspension Pending NEPA Environmental Review of the Construction Permit for the Duane Arnold Energy Center Docket No. 50-331," copy enclosed.
