**Cultural Resources Surveys for PEF/LNP (SAJ-2008-00490) and
Coordination with the Seminole Tribe of Florida
Teleconference - August 17, 2011 - 10:00 AM EDT**

**Participants: U.S. Army Corps of Engineers (Corps)
U.S. Nuclear Regulatory Commission (NRC)
Seminole Tribe of Florida (STOF)
Progress Energy Florida (PEF)**

I. Background Chronology:

1) Letter to STOF THPO from Corps dated May 24, 2011 with PEF's proposed Cultural Resource Survey Plan attached for THPO's review. Proposed work plan addresses survey work for transmission line ROWs, the revised blowdown pipeline ROW, and three additional parcels for road access and training center.

2) Letter from SHPO to PEF dated June 7, 2011: Proposed strategy, as presented in the work plan, is sufficient to identify and evaluate any cultural resources within the proposed transmission ROWs, access road, blowdown pipeline, and three additional parcels acquired for training site and access road. Expectation by SHPO of receipt of cultural resource assessment report(s) with the findings of the proposed field investigations.

No timeframes in letter - timeframes in proposed work plan?

3) Letter from STOF THPO to Corps dated June 20, 2011 and follow-up email from Elliott York dated July 18, 2011: STOF requests to review the survey results for finalized transmission line corridors before making any further comment, rather than review the work plan leading up to the survey.

II. The timeline and mechanisms for the performance and review of the cultural resource surveys - Department of the Army Permit special conditions?

- No work allowed within subject project sites until OK/sign-off by Corps? (OK/sign-off dependent on receipt and review of survey results and coordination with SHPO and STOF?)

III. Mechanisms to deal with the results of the cultural resource surveys, for the proposed Levy Nuclear Plant project, particularly the transmission lines associated with the project.
