Subject: Proposed 13.6 wording

Stacy below is STP Units 3 & 4 proposed text to be included in FSAR Section 13.6 as the final paragraph of this section:

In accordance with CFR 73.67(g) 1-3, as clarified by RIS 2005-22, written agreements will be developed and implemented with the supplying fuel manufacturer to transport new fuel assemblies (including returning shipments) between the fuel manufacturing facility and the STP 3&4 site under the fuel manufacturer's Transportation Physical Security Plan. Under these agreements, the transfer of responsibility for transportation security of new fuel assemblies, including damaged new fuel assemblies, occurs at the STP 3&4 site when STPNOC accepts delivery of new fuel assemblies from the carrier (manufacturer) or the carrier accepts new fuel from STPNOC. Under these agreements, the fuel manufacturer will be responsible for the in transit physical protection of the new fuel assemblies. The manufacturer and STPNOC will maintain responsibility for the appropriate administrative and Material Control and Accounting (MC&A) requirements when acting as a shipper or receiver.

If there are any questions please contact us for clarification. Thank you.
